

Control and Connectivity Equals More Profit

AutoEase[®]

MANAGEMENT SYSTEM

Designed to Handle the Complex Needs of Most Any Parts Distribution Business.

- ✓ Comprehensive Warehouse Management System
- ✓ Become the **Electronic First Call** to Your Customers via eCommerce Solution or Direct from a PartsWatch System
- ✓ AutoEase runs WD and store locations from a single database
- ✓ Empower your sales force with mobile POS
- ✓ Radio frequency paperless warehouse

System Highlights

- Automated Price Loading
- Automatic Electronic Ordering
- Integrated AP & GL
- Inventory Control
- Sophisticated Discounting

Benefits / Features

- **Radio Frequency / Paperless Warehouse**
Increased order accuracy, pick tickets are automatically sent to hand held terminals for picking. Supports "Hot Shot" deliveries as well as customer stock orders.
- **Mobile POS**
Verify eligibility of returns at your customer site. Instantly create and send a return authorization to your warehouse printer and your customer's fax machine. Empower your sales force and increase sales. Instantly print a pick ticket at your warehouse from your customers site.
- **Integrated Jobber**
Receive orders 24 hours a day, 7 days a week, 365 days a year, without adding support personnel.
- **Phone Room**
Centralized phone room, supports all remote locations from one centralized location. Parts can be sourced from any location if necessary ensuring that orders are fulfilled.
- **Job Queue**
The Job Queue allows automatic, user-definable recurring report printing, for daily, weekly & monthly reports & or update programs. Job queue is designed to simplify recurring job processing, (you no longer will have to spend time printing the same reports day after day) ensuring procedures are performed in the user-defined preferred order.
Note: RF, AP&GL are option billable features

AutoEase Products & Service Menu

AutoEase is designed specifically to meet the needs of the Auto Parts, Heavy-Duty Truck and PBE distributors at both the retail and wholesale levels. AutoEase runs on the LINUX operating system and is well suited for two step distributors and retail chain stores with their own distribution centers. AutoEase can control multiple stores and distribution centers from a common database. With its own optional polling package "Remote Store Network," AutoEase can support any combination of centralized and/or distributed data processing. With over twenty five years of experience since the first version of AutoEase was installed, this package is a fully proven solution for distributors.

AutoEase provides the Competitive Advantage.

With over twenty-five years of development, the AutoEase system is designed with the features and flexibility to handle the complex needs of almost any parts distribution business. From two-step distribution to multi-location and warehouse operations, AutoEase can accommodate any combination of wholesale and retail needs. Our development team continues to lead the industry with first to market functionality, providing our clients with the competitive advantage they need while leaving other software suppliers chasing our innovative developments.

**“Because AutoEase helps us run our daily business,
we can dedicate our time to focus on
Our Customers and what they need from us.”**

Today many large distributors demand the stability of a Linux-based system that can fully integrate with the ever-expanding demand for eCommerce. AutoEase provides customers with exactly that; a proven, feature rich integrated warehouse and store system with connectivity to your own company controlled web site along with EDI and full barcode capabilities. **This package is a fully proven solution for distributors.**
